LIEPP Partners

LIEPP is based on four founding centers: the Centre d’Études Européennes (CEE), the Department of Economics, the Centre for the Sociology of Organisations (CSO) and the Centre for Studies in Social Change (OSC). The directors of these units are part of LIEPP's Scientific Council.

Besides its academic founding centers, LIEPP has established several partnerships with other organizations:

The Foundation de France calls on a LIEPP team, led by Daniel Benamouzig (CSO / CNRS) and Henri Bergeron (CSO) to investigate the role of private philanthropy in the health sector.

LIEPP receives a financial support from the 'Fonds d'Expérimentation pour la Jeunesse' (FEJ, the Experimental Youth-Development Fund) to conduct a multiannual assessment of mediation schemes against violence and harassment in high school and of the prevalence of violence in middle school.

The 'Direction de l'évaluation, de la prospective et de la performance', (DEPP) part of the 'Ministère de l'éducation nationale', is another supporter of LIEPP, which tasked it to carry the "Stereotypes, self-censorship and academic success" project. This project studies the negative effects of stereotypes associated with disadvantaged social classes on students' success in school.

LIEPP also benefited from the financial support of the OECD for the creation of a report about the pros and cons of a single contract of employment and its ability to reduce dualism in the labour market.

Furthermore, LIEPP is a partner of the audit firm KPMG and the consulting firm Euréval, in an evaluation project requested by the French National Assembly. In this context, LIEPP researchers regularly assess French public policies in three main areas: economic policy, taxation and sustainable development (batch 1); social policy, including employment, cultural and educational dimensions (batch 2); sovereignty policies (administration of justice, security policies, foreign policies or dealing with issues of governance by the state, local governments, public institutions or other bodies of public service) (batch 3).

As part of batch 2, LIEPP led an ongoing study of family policies in Europe; the study was conducted in partnership with the French Observatory of Economic Conditions under the direction of Hélène...
LIEPP works with the Société du Grand Paris on two large-scale projects: the first evaluates the effects of transport policies on international companies’ location, and the second focuses on the impact of Grand Paris Express on real estate. These studies are directed by Pierre-Henri Bono.

The Mission Interministérielle de Lutte contre les Drogues et les Conduites Addictives (MILDECA) has asked LIEPP for an evaluation of its actions as a coordinator of the framework for the French government 2013-2017 plan to fight drugs and addictions. LIEPP’s research team is led by Louise Lartigot-Hervier, under the scientific supervision of Henri Bergeron (CNRS/CSO) and Patrick Hassenteufel (UVSQ).
