Organisation of Research at LIEPP

LIEPP is based on an innovative method founded on a multidisciplinary approach and the combination of qualitative, comparative and quantitative assessments of the same policy.

LIEPP supports several research projects and most of them are already part of the various Research groups that are co-directed by researchers from different disciplines.

Three Research Groups were built in 2012:

- Evaluation of Democracy (EvalDem)
- Educational Policies
- Socio-fiscal Policies

Two more Research Groups started their activities in 2014:

- Health Policies
- Higher Education and Research

Within the framework of a Research Group or on a specific policy, various research projects are supported by LIEPP.

- "Active orientation" towards higher education : policies and mechanisms
- Activité réduite et parcours professionnel
- Commission d'évaluation de la loi pour la croissance et l'attractivité
