Carbon Capture and Sequestration

A conference with Dr Malcolm Wilson, Former member of Working Group III of the Intergovernmental Panel on Climate Change (IPCC) and a lead author on the IPCC Special Report on Carbon Dioxide Capture and Storage.

Carbon Capture and Sequestration

With

Malcolm Wilson
Former member of Working Group III of the Intergovernmental Panel on Climate Change (IPCC)
Lead author on the IPCC Special Report on Carbon Dioxide Capture and Storage
Adjunct Professor in the Faculty of Engineering and Applied Science at the University of Regina, Canada

Moderated by

Giacomo Luciani
Scientific Advisor for the Master in International Energy at PSIA

Thursday 4th December
12:00 pm – 1:00 pm
PSIA, Room S1, 28 rue des Saints-Pères, Paris

RSVP
Sciences Po students: please register online [1]
External guests: psia.events@sciencespo.fr [2]

For more than thirty years, Dr. Malcolm Wilson has played an influential role on the world stage in the research and development of enhanced oil recovery and carbon capture and storage. Dr Wilson is currently the COO of a Regina-based bioenergy company, Prairie Biogas Ltd, and an Adjunct Professor in the Faculty of Engineering and Applied Science at the University of Regina, Canada. Dr Wilson was the director of the Office of Energy and Environment at the University of Regina from 2000 to 2010, and the CEO of the Petroleum Technology Research Center in Regina from 2010 to 2013. Dr Wilson was a member of Working Group III of the Intergovernmental Panel on Climate Change (IPCC) and a lead author on the IPCC Special Report on Carbon Dioxide Capture and Storage (2005). The IPCC was awarded the Nobel Peace Prize jointly with Al Gore in 2007.
