JOIN US IN BUILDING SCIENCES PO’S FUTURE
The renovation of the Artillerie site is part of our Campus 2022 development plan, which is much more than just an architectural project. It is a plan for the complete renewal of Sciences Po, 150 years after its founding. It is a plan that looks well into the future, with sustainable, flexible facilities that will allow Sciences Po to keep spearheading innovation in teaching and research for the 150 years to come.”

FRÉDÉRIC MION,
President of Sciences Po
UNITING AROUND THE ARTILLERIE

The Artillerie is the cornerstone of Sciences Po’s plan for 2022. From the start of the 2021-2022 academic year, the 22,000 sq.m complex formed by the Artillerie and 13 Rue de l’Université will be the core of our urban campus, bringing together research centres, a new library, a learning garden, collaborative workspaces and other communal areas designed for easy adaptation to new practices in higher education.

The plan embeds Sciences Po in its historic district of Saint-Germain-des-Prés, while allowing it to design a 21st-century campus worthy of the world’s leading universities.

€12.2m already raised

€20m in private funds are needed for the renovation of the Artillerie

THE ARTILLERIE IN FIGURES

14,000 sq.m of new spaces

1,000 sq.m connected library

1 studio for the school of journalism

300 sq.m dedicated to business creation
Sciences Po is opening up to emerging regions, particularly Africa, with 470 academic partnerships and 46% of international students.

This continent’s development involves major intellectual issues, which already feed into our programmes. It also reveals a wealth of talents and skills that we mean to continue supporting.

An ambitious cooperation effort has been underway for several years, resulting in the creation of the Europe-Africa undergraduate programme, a Master’s programme focused on African cities and a dedicated Executive Education course offering. We have expanded our network of local partners and recently opened a Sciences Po office in Nairobi.

These efforts have kicked off a virtuous circle of exchanges, which we need to intensify attracting more African students and encouraging our students’ outgoing mobility to the region. To do so, we have to strengthen and expand our scholarship schemes.
Establishing a Civic Learning Programme that has students set foot in places they wouldn’t otherwise have been in is perhaps the biggest favour you could have done them. The ability to work with the primary beneficiaries of public and social policy seems crucial to me. It gives students a concrete understanding of what solidarity means.”

MARTIN HIRSCH
Managing Director - APHP, Civic Learning Programme partner organisation

Because an excellent education is also a socially responsible education, we want to make studying at Sciences Po a unique opportunity for student engagement.

Consequently, all our undergraduate students are required to complete a personal project over the three years of their degree that serves the public interest and promotes equality and solidarity.

The Civic Learning Programme is a central pillar of the curriculum. It aims to connect our undergraduate courses to engagement on the ground through a process of active reflection. It asserts Sciences Po’s original goal of training decision-makers with high ethical standards, aware of social conditions at every level and willing to give of themselves for others.

The programme hinges on students doing volunteer work with diverse organisations and beneficiaries in the fields of education, employment, the environment, justice, health and peace.
Becoming a Sciences Po donor means being directly involved in the rich life of our institution, sharing the special moments of students’ engagement and academic development and accessing exclusive conferences and events.

**GIVE TO SCIENCES PO**

If you are a French tax resident, you can benefit from the following tax reductions:

66% of your donation is tax deductible, up to 20% of your net taxable income.

75% of your donation is deductible from real estate wealth tax, up to €50,000 per year.

**IF YOU LIVE OUTSIDE FRANCE**

Receive the tax benefits provided for in your country's legislation.

**In the US:**
Sciences Po American Foundation, Tax ID: 27-0559416
www.usscpo.org

**In the UK:**
Sciences Po Alumni UK Charity Trust, www.sciencespoalumni.ukcharitytrust.org

**Elsewhere in Europe:**
Transnational Giving Europe allows you to benefit from tax deduction options in 20 countries.

**WAYS TO GIVE**

By cheque payable to the Fondation Nationale des Sciences Politiques (FNSP) - Strategy and Development Division
27, rue Saint-Guillaume
75337 Paris Cedex 07

Online, as a one-off payment or by direct debit, at soutenir.sciencespo.fr
