PSIA CURRICULUM
2018 | 19
At the forefront of global affairs education, the Paris School of International Affairs (PSIA) is the only school of international affairs in France, and amongst the largest in the world.

PSIA offers future global actors an innovative and comprehensive grounding in international affairs. It does so through a curriculum which interlaces conceptual foundations and current scholarship with the most up-to-date practices. World-renowned professors and leading practitioners teach over 400 courses annually in the most salient fields of international affairs. Whilst the vast majority of courses are taught in English, about a quarter of them are taught in French.

This brochure consolidates the complete PSIA course offer for the 2018/19 academic year, by our seven core Master Programs and by our 24 Regional and Thematic concentrations.

PSIA excels at bridging the gap between theory and practice. In my experience, this is ideal for future leaders who aim to thrive as innovative and responsible actors of a challenging global world.

The rigorous commitment and engagement of our faculty, staff and students are key to PSIA’s success. I am grateful to all of them for their remarkable efforts.

Enrico Letta
Dean, February 2019

ABOUT PSIA
Shaping global actors for a more secure world.

One of the most prestigious schools in Europe, Sciences Po has cultivated the minds of leading government officials, diplomats, and key international stakeholders for over a century.

Consolidating this tradition of excellence, the Paris School of International Affairs provides graduate students with groundbreaking insights into global affairs.

A bilingual professional school (English-French)
Attracting the best and brightest students worldwide, PSIA has a population of 1500 students representing over 100 countries. With 70% of courses taught in English, students may take a full course of study in English, and become multilingual while in Paris.

At the forefront of global affairs education
The PSIA curriculum combines conceptual foundations and current scholarship, with the most up-to-date operational training and best practices. World-renowned professors and leading practitioners teach over 400 courses annually in the most salient fields of international affairs. In addition students frequently interact with world leaders and scholars through PSIA’s extensive series of public events, notably during the annual Youth and Leaders Summit.

With the support of academic advisors, graduates complete the two-year program, which typically includes a full semester internship, and are thus well-positioned to pursue high-profile careers, joining the vast network of Sciences Po alumni across continents. PSIA’s career office works extensively with students to find the right merger of intellectual capital, individual objectives, and professional achievement.
PSIA offers a choice of 7 master’s programs in the most salient fields of international affairs:
- International Security
- International Public Management
- International Economic Policy
- Environmental Policy
- International Development
- Human Rights and Humanitarian Action
- International Energy

Students can pursue a two-year Master’s in any of these fields in one of three ways:
- Over two years at PSIA;
- As part of a joint program in Journalism and International Affairs with the School of Journalism at Sciences Po;
- As part of a dual degree program with one of PSIA’s university partners:
  - International: Bocconi University • Columbia University • Freie Universität • Georgetown Law • King’s College London • London School of Economics • MGIMO • Peking University • University of Saint-Gallen • Stockholm School of Economics
  - National: AgroParisTech • ISAE-Supaero • Sorbonne Université • Saint-Cyr Coëtquidan

PSIA also offers a one-year Master’s in Advanced Global Studies, covering the same seven fields, for candidates with a degree and at least five years of professional work experience.

PSIA students select one or two concentrations, depending on their program, which enable them to chart their very own career path:
- Regional: Africa • China and East Asia • Europe • Latin America • Middle East • North America • Russia • South and Central Asia
- Thematic: Agriculture • Defense and Security Economics • Diplomacy • Emerging Economies • Environment • Global Economic Policy • Global Health • Global Risks • Human Rights • Intelligence • International Energy • Media and Writing • Methods • Migrations • Project Management • Research Track
