PSIA CURRICULUM

FALL 2025
SPRING 2026

At the forefront of global affairs education, the **Paris School of International Affairs (PSIA)** of Sciences Po is the second ranked school of international affairs in the world. We are proud of the significant impact the School has had in equipping students to understand and navigate the complexities of our global landscape over the past 15 years. Throughout their time at PSIA, students enhance their knowledge and skills, whilst gathering relevant experience to become catalysts for change in the transition towards more secure, equitable, and sustainable societies. Upon graduation, they are ready to become responsible leaders in international affairs.

With English as the language of study, our innovative curriculum seeks to bridge the gap between theory and practice by interlacing conceptual foundations and current scholarship with the most up-to-date operational training and best practices. World-renowned professors and leading practitioners teach over 400 specialised courses annually in the most salient fields of international affairs. Our Master's programs and wide range of thematic and regional concentrations allow students to personalise their academic curriculum and chart their very own career paths.

This document presents the complete PSIA course offer for the 2025/26 academic year, responding to the evolving dynamics and new arising challenges of global affairs.

The international community faces profound challenges amidst escalating conflicts, the accelerating climate crisis, the impact of emerging technologies such as generative AI, systematic violations of human rights and growing barriers to the international economy and global trade. I am proud of the contribution that the School plays in nurturing the next generation of leaders. I am deeply grateful to our esteemed faculty, dedicated staff, and exceptional students, whose persistent commitment and remarkable efforts are what ensure the success of PSIA.

About

PSIA

Shaping global actors for more secure, just and sustainable societies

At Sciences Po's **Paris School of International Affairs (PSIA)**, our goal is to attract the best and brightest students from across the planet and to instill these future leaders with the knowledge, skills and experience to understand, navigate and shape the complexities of our ever-evolving world.

Since 2010, PSIA has continued Sciences Po's century-long tradition of providing world-class graduate education and professional training in the most salient fields of international affairs.

Our central location in Paris, our position at the heart of Europe and with English as the main language of study help us to attract a diverse community of students representing more than 120 nationalities, who join us with a variety of academic backgrounds.

At the forefront of global affairs education

PSIA is a world leader in international affairs and contributes significantly to Sciences Po's continuous placement amongst the top 4 institutions globally for "politics and international studies" over the past decade (and #1 in Europe since 2020) in the QS ranking.

World-renowned professors and leading practitioners teach specialist courses which balance conceptual foundations and current scholarship with the most up-to-date operational training and best practices.

PSIA students have regular opportunities to challenge and engage with world leaders and scholars through our extensive series of public events, including our annual flagship Youth & Leaders Summit.

By the end of their two years with us, PSIA graduates are well-positioned to **pursue high-profile careers**. Our graduates work across the globe and in all sectors. They become political advisors, public servants, analysts, researchers, diplomats, consultants and stakeholders in international affairs.

At PSIA, we prepare our students to become agents of change in **the transition for more secure, just and sustainable societies**.

8 MASTER'S PROGRAMS

15 DUAL DEGREES

16 CONCENTRATIONS

Customize your professional profile

PSIA offers **a choice of 8 Master's programs** in the most salient fields of international affairs:

Environmental Policy • Human Rights and Humanitarian Action • International Development • International Economic Policy • International Energy Transitions • International Governance and Diplomacy • International Security • Technology and Global Affairs

Students can pursue a **two-year Master's** in any of these fields in one of three ways:

- Over two years at PSIA;
- As part of a joint program in Journalism and International Affairs with the School of Journalism at Sciences Po;
- As part of a dual degree program with one of PSIA's university partners:

International: *Bocconi University • Columbia University • Freie Universität • Georgetown Law • IE University • King's College London • London School of Economics • Peking University • University of Saint-Gallen • University of Cape Town • Stockholm School of Economics*

National: *AgroParisTech • ISAE-Supaero • Sorbonne Université • Saint-Cyr Coëtquidan*

PSIA also offers a **one-year Master's** in Advanced Global Studies, covering the same eight fields, for candidates with a degree and at least five years of professional work experience.

PSIA students select **one or two concentrations** (or minors), depending on their program, which enable them to chart their very own career path:

Regional: *Africa • Asia • Europe • Middle East • The Americas*

Thematic: *Agriculture and Food • Diplomacy • Environment and Sustainability • Gender Studies • Global Economy • Global Risks • Human Rights • Intelligence • Methods • Migration • Project Management*

PSIA

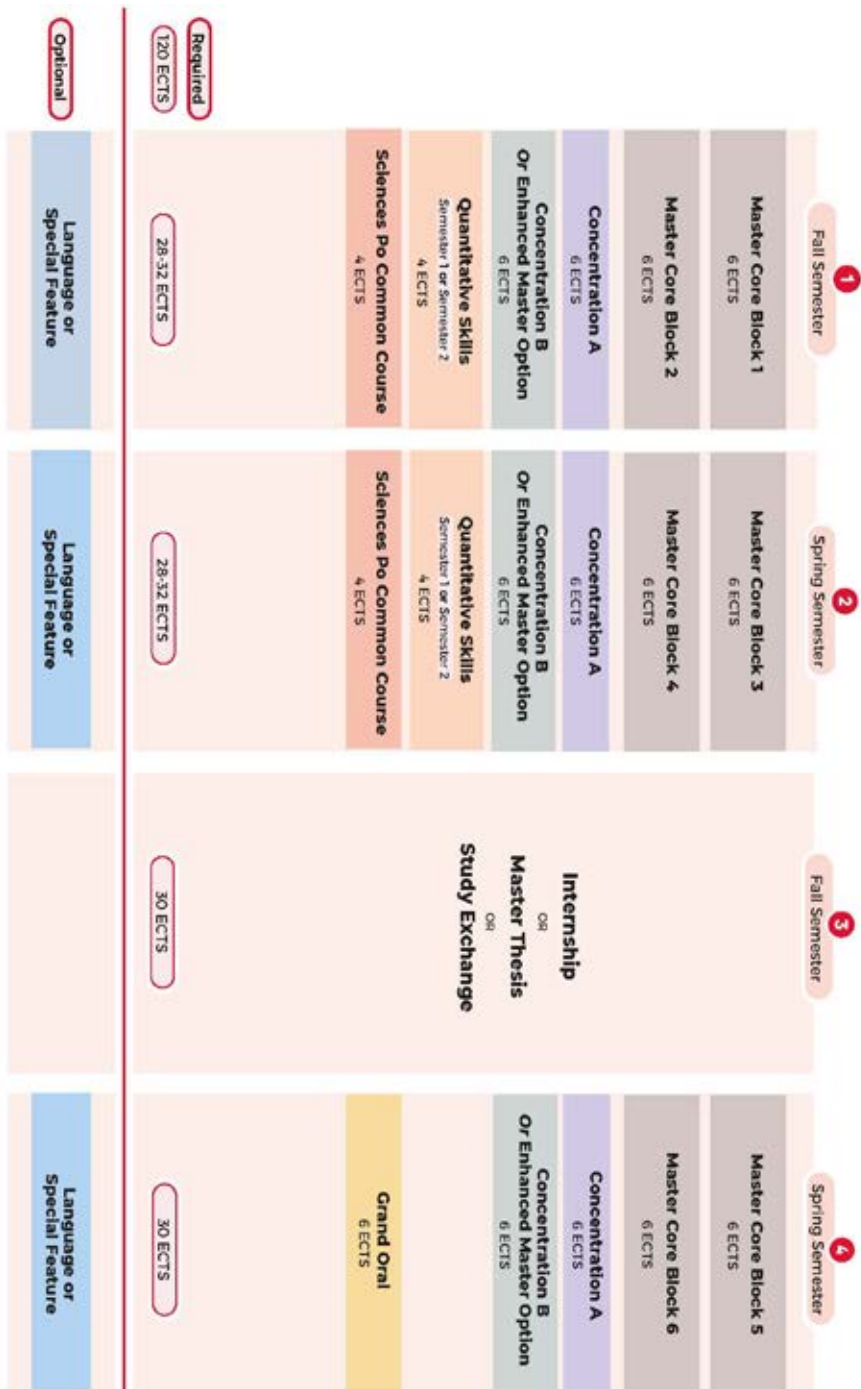

Standard Course of Study

Some 80% of students follow a standard two-year program at PSIA. The structure of the standard program appears on the page opposite.

Course offered in each Master specialisation become progressively more advanced semester by semester.

Students are expected to devote five hours to independent study for each hour spent in the classroom. In other words, students should devote about 125 hours to reading, writing and engaging with course materials for each 24 hours of course teaching.

INTERNATIONAL *SECURITY*

This Master in International Security is designed to equip students with a nuanced understanding and analysis of contemporary issues in the international security domain. This encompasses a wide range of 21st century topics, such as shifts in the global landscape, new forms of crises and conflicts, transnational terrorism, nuclear proliferation, cyberwarfare, etc. The curriculum comprehensively addresses the multifaceted nature of security at

a progressive pace so students can acquire and refine their analytical and critical skills. With faculty drawn from both academia and the field, including the military sector, students are constantly challenged to better understand security issues on both international and regional stages. The diverse expertise of the faculty enhances the depth and practical application of the knowledge acquired during the program.

INTERNATIONAL GOVERNANCE AND DIPLOMACY

The Master in International Governance and Diplomacy bridges the disciplines of political science, international law, economics, management and diplomacy to prepare students for impactful careers in multilateral organizations, foreign ministries, non-governmental organizations, consultancies and global policy think tanks. The program provides students with the analytical depth and practical tools to navigate complex governance challenges across the globe. Diplomacy is taught as a method used by high-

level practitioners in the field, including diplomats, and practical components are emphasized in all courses. Through case studies, simulations, and expert-led seminars, students learn to craft policy, mediate conflict, and lead with integrity in international arenas. Students are encouraged to engage critically with course materials in a manner that aligns with their professional goals. The Master incorporates Diplomacy as a mandatory concentration for all students.

INTERNATIONAL *ECONOMIC POLICY*

The Master in International Economic Policy equips students with the analytical and practical tools to understand and shape international economic policy. Trade wars, sanctions, sovereign debt, global inequalities, and the green transition: the program focuses on the most pressing issues that challenge economic policymakers at the international and regional levels. At the heart of the program is an extremely solid foundation

in the theory of international economics, which is linked to more practical aspects in courses that bring in expert policymakers. The curriculum also includes courses that teach students the technical skills that they require in their future careers. Candidates for this program are expected to have successfully completed at least undergraduate level courses in microeconomics and in macroeconomics.

ENVIRONMENTAL POLICY

The Master in Environmental Policy is a comprehensive program preparing the next generation of policymakers, project managers, analysts and auditors with the skills needed to address global environmental challenges. This program provides rigorous training covering scientific, legal, economic, political and social aspects of climate change, biodiversity, water management

and energy transitions. It responds to an urgent need worldwide for critical understanding of the challenges and opportunities in strategic decision-making regarding environmental and natural resources issues. To this end, the Master provides students with the necessary understanding of policy tools and processes while developing their literacy in earth sciences and environmental issues.

INTERNATIONAL *ENERGY TRANSITIONS*

The Master in International Energy Transitions responds to the increasing worldwide demand for energy expertise through a cutting-edge academic curriculum. The program provides students with a comprehensive understanding of energy issues, across disciplines and energy sources. The governance of the energy transition in the context of global warming, universal access to modern energy, and security of supply are key challenges for each country and

the international community. The program encompasses economic, political, technological, legal, distributional and international relations dimensions. The program emphasizes students' active participation. Many of the faculty come from the main European energy think tanks, and from the international energy industry or the consultancies. Each year, the Master hosts the Paris launch of the International Energy Agency's World Energy Outlook.

TECHNOLOGY AND *GLOBAL AFFAIRS*

The Master in Technology and Global Affairs takes a multidisciplinary approach to prepare students to navigate skillfully the complex intersection of rapid technological change and the transformation of the global geopolitical landscape. It equips them with the knowledge and expertise to become leaders in the public and private sector. The program's curriculum uniquely

weaves three key dimensions: the impact of technology on geopolitical and security developments; the economic and business transformations driven by technology; and the technology driven evolutions of citizenship and fundamental rights. Issues related to the governance and regulation of technology are treated as a fourth, cross-cutting dimension.

MASTER IN ADVANCED GLOBAL STUDIES

The one-year Master in Advanced Global Studies (MAGS) is designed for early/mid-career professionals with a Bachelor's degree and at least five years of full-time work experience. It offers a unique opportunity to develop expertise in a core field of international affairs through an accelerated academic experience.

Students choose from one of PSIA's eight Master specialisations and one of the 16 concentrations. They attend courses alongside all other PSIA students, while also benefiting

from MAGS-specific components tailored to their advanced professional profile, including:

- **Capstone project**
- **Winter bootcamp**
- **Summer session**
- **Career development workshops**

This program is ideal for professionals seeking to enhance their expertise, expand their network, and accelerate their career in international affairs.

The structure of the MAGS program appears on the page opposite.
