- **ACROPOLIS- Belgian Technical Cooperation for development,** Proposal Reviewer in the area of Aid effectiveness
- **The Health Africa Forum (May 2014 in Geneva)-**
- **FACTS Initiative- FACTS Reports,** a journal for a development actors' science

Summary of work experience

Dominique Kerouedan grew up and went to school in Côte d'Ivoire, Senegal, UK and France, thus experiencing from a young age the differences between many cultures and learning how to adapt to very different contexts and people, such as West Africa and London in the sixties. She was brought up and educated both by her French parents and a British grandmother married to her grandfather after World War II. She then studied Medicine in Paris, Public Health in the United States (UC Berkeley), Law

in the West Indies, and then, back in France, completed another doctorate in Health Sciences (Epidemiology and Public Health) while she was working at country level in Abidjan on the limitations of HIV/AIDS international strategies in West Africa in the nineties. Speaking and writing French (fluently), English (fluently) and Spanish (to a certain extent), her career can be summarized in 4 areas (see detailed missions and tasks thereafter):

(1) Humanitarian aid, as a medical doctor in Refugee Camps in Pakistan (Afghan refugees) and Thailand (Karen refugees), as well as caring for street children and adolescent detainees (Madagascar), providing care for rural populations in Rwanda, or planning maternal and child health interventions for Afghan populations in Peshawar (working with NGOs);

(2) Epidemiology, as public health a researcher in Gabon (Franceville CIRMF Research Center), Congo (Brazzaville Blood Bank), and the French West Indies (INSERM), studying HIV transmission via blood, sexual contact and maternal transmission at the very beginning of the pandemic in Africa and the Caribbean islands (with research institutions);

(3) Overseas development aid project and program manager, as a Technical Adviser on a long-term basis, in Côte d'Ivoire (6 years) and Madagascar (3 years), respectively to the National AIDS/STI/TB Control Director in Abidjan (national level), and to the Regional Health Director in Tuléar (Southern Madagascar 21 districts), as to implement joined HIV/AIDS and health systems strengthening projects funded by the French technical cooperation and the European Commission (with the French Government and EU institutions);

(4) International aid strategies and policies evaluation, as an independent Expert in International Health and Global health (for over 15 years) analyzing the contribution to Health and Development and to the implementation of Health MDGs of the following institutions: UN agencies (UNAIDS, UNDP, WHO), France Ministry of Foreign Affairs, Agence Française de développement and ESTHER/MOH France, the European Commission, the World Bank, the Global Fund to fight AIDS, TB and Malaria, the USAID, PEPFAR, the German Technical cooperation, etc. over the period 2000-2016 (detailed trip mission tasks and countries visited are outlined below).

(5) currently working as a Medical Doctor specialized in Public Health and Social Medicine in Paris, taking care of street people, migrants as well as drug users, including women, in all dimensions: administrative, juridical, social, medical, psychological and psychiatrically. Ministry of Health/Association Charonne (2017-ongoing).

Human rights and health have been central to Dominique Kerouedan's work throughout the regions she visited and policy discussions she had with country authorities, civil society stakeholders, and leaders of international institutions. While she was working as a Medical Doctor in Refugee camps it became clear early on that Medicine and Public Health skills were not sufficient to respond to the extremely bad and unequal Afghan women's and girls' health conditions, nor to Karen adolescent fighters' health knowledge, so as to reduce the mortality affecting these populations. Education, empowerment, political will and peace, to name a few issues, notwithstanding human rights mainstreaming, had to be taken into consideration if we were to succeed.

Coming back from the camps Dominique Kerouedan decided to work with Amnesty International's Medical Commission in Paris, as well as the Juridical Commission, at the time when the Teams were preparing an international symposium on the involvement of medical doctors in torture and the death penalty in countries suffering from sharia apartheid, regimes or dictatorship (South Africa, Pakistan, Mauritania, Latin American countries, etc.). The title of the symposium became the title of her thesis for the Doctorate in Medicine: *"Medicine at risks: Serving or Undergoing Repression"*. This work led her to think further about how we could improve populations' and health workers' conditions, taking into consideration State Sovereignty issues and International Public Law constraints. This is what took her to then study International Public Law through a bachelor's in law.

Ever since, and over the last 30 years, Dominique has kept an eye on human rights and health, whether working on HIV/AIDS programs, Maternal and Child Health issues, raising awareness on sexual violence in conflict or post-conflict contexts, examining the distribution of ODA among countries and speaking out about the inequity and inequality of financial allocations, despite existing, though imperfect, allocation criteria, etc. Dominique Kerouedan's stands on France and the European Union's policies and strategies, acknowledged by the European Court of Auditors, or her publications in the press, in professional journals, are well known and much appreciated, both by the students, the professionals and the political stakeholders targeted. The French Government and Institutions, and well-known respected academics commissioned Dominique Kerouedan to do important policy work on: (i) France's contribution to health MDGs, (ii) France's contribution to PPPs, (iii) France's contribution to disease alert and surveillance, particularly in the area of infectious diseases, etc. (refer to list of publications).

Her experience and vision led Dominique Kerouedan to pull medical and health issues outside Medicine, or even Public Health, and take them to the attention of future leaders, be they prepared to work with public institutions, private companies, or public-private partnerships. The famous Sciences Po Institute of Political Studies in Paris approved the relevance and importance of raising awareness about health, human rights and development issues, and accepted Dominique's proposal of offering a Global Health program customized to the students of International Affairs' profiles and future positions and leadership. The objective of the Concentration in Global health she's founded at the Paris School of International Affairs, is to raise political interest and generate professional legitimacy for them to deal with major upcoming health challenges, wherever they work and whoever they work with in the upcoming world³. Having worked in many countries around the world most of my life, I enjoy working in teams to find the best way of improving the right of everyone to reach the best attainable physical and mental health, to enjoy health as freedom, just as Amartya Sen suggested we see "development as freedom". This is still what I am working at, while I take care of the health and rights of street people, migrants, asylum seekers and drug users in the city of Paris, working as a Medical Doctor.

In 2012 Dominique Kerouedan was awarded the Chair "Knowledge against Poverty" in the most famous academic institution in France, the renowned **Collège de France**, where distinguished scientists have taught since 1530, when the King François 1er invited "les Lecteurs Royaux" to teach the general population⁴.

In 2016, Dominique was elected corresponding Member of the **National Academy of Overseas Sciences** in France, and in 2017 corresponding Member of the **National Academy of Medicine**, where she's currently Rapporteur of the Working Group entitled: "*Les phénomènes migratoires: conséquences économiques et sociales*".

Since September 2017 she is working as a Medical Doctor specialist in Public Health and Social Medicine in 2 health centres in Paris (*La République*), one for women, one for men and women, street people, drug users as well as Refugees and Migrant populations, looking at their health globally: medically, socially, mentally, etc., as well as at their access to health and health insurance and protection rights in France, and to regular resident status in France.

Education

Psychopathology. Ecole pratique des hautes études en psychopathologies (EPHEP) (2015-2017). Internship at the Unité d'accueil et de psychothérapie familiale. Société parisienne d'aide à la santé mentale.

To provide technical support to the Political Affairs and Human Development Department to prepare the First meeting of Ministers of Health of Africa, the Caribbean and Pacific (ACP) States held in Brussels on October 24-26 2007, with the support of the European Member States, EU Institutions and UN agencies.

Policy Reports to the French Government on French Cooperation reforms and France's contribution to the implementation of Health Millennium Development Goals

See list of publications 2002-2006

International Health assignments in Southern Countries 2000-2006 (continued)

January-December 2006. **Member of the Steering Committee of the Evaluation of the French MOH** funded bilateral ESTHER (Ensemble Solidarité Thérapeutique en Réseau) HIV/AIDS Programme (founded and led by Bernard Kouchner) over the period 2001-2006. To provide oversight on the evaluation strategy, design, methodology and terms of reference, as to evaluate the relevance, effectiveness, efficiency, sustainability and performance of the programme in various Asian and African countries (in the field of care and treatment for HIV patients and institutional network development with people living with HIV organisations).

Team leader. **Global Fund ATM project in Algeria/Ministry of Health Algiers**. June 2006. To provide technical support to the GFATM HIV/AIDS project in Algiers in project management and Monitoring and Evaluation. Training of all sub recipients and project management unit team on HIV/AIDS M&E methodology, tools and management. Programme review with the Project management unit and Principal recipient team.

Team leader. **Eritrea. The World Bank and the Government of Eritrea.** December 2005 to March 2006. Evaluation of the World Bank sponsored HIV/AIDS, TB and Malaria control project over the period 2001-2006 in Eritrea. HIV/AIDS, TB and Malaria situation and response analysis. Trip missions countrywide. Effectiveness, efficiency, impact analysis of the project. Final report to the country and to the World Bank March 2006.

Team leader. **Benin. The European Commission/AGEG.** September-October 2005. Evaluation of the European Commission supported Health projects in Benin over the period 1993-2005 (7th Health EDF project final evaluation and 8th Health EDF project mid-term evaluation). Analysis of the Public Private Partnership development in the Health sector. Contribution to the preparation of the 9th EDF Health project in Benin.

Team leader. **Niger. GTZ Back-up Initiative for the Global Fund ATM.** Joint Mission with UNAIDS, WHO, GIST. Needs assessment for long-term technical expertise to provide support to the Principal recipient of the Global Fund ATM funds in Niger. Programme review and evaluation, CCM case study and analysis, health system constraints analysis in the context of the GF HIV/AIDS programme implementation. Elaboration of the TOR for the required expertise. August 2005.

Senior consultant. **French Ministry of Foreign Affairs, the Centre of Population and Development (CEPED) in France and the United Nations.** April 2005. Elaboration of France's contribution to the 38th session of the United Nations Commission on Population and Development meeting in New York April 4 to 5, on the theme: "Population, Development and HIV/AIDS with particular emphasis on Poverty. Perspectives on the countries of the South".

Team leader. **PEPFAR/FHI/USAID. Abidjan Côte d'Ivoire.** October 2004. Situation and response analysis with regard to the public-private partnership in the field of HIV/AIDS with private companies in Côte d'Ivoire, in the context of the preparation of the US President Emergency Plan for AIDS Relief (PEPFAR) project design and implementation in Côte d'Ivoire. Final report and recommendations, 102p.

Senior consultant. **PricewaterhouseCoopers, Rabat office, Local Fund Agent for the Global Fund ATM HIV/AIDS Proposal follow-up in Algeria and Morocco. Alger.** September 2004. Provide technical assistance to conduct the evaluation (institutional, financial and monitoring and evaluation) of the Principal Recipient prior to the signature of the Grant Agreement between the MOH in Algiers and the GF ATM Secretariat. Review of HIV/AIDS/STI Work plan and M&E tools.

Senior consultant. **Michèle Barzach SI/French Ministry of Foreign Affairs. London and Washington DC.** July 2004. To conduct a study on Public-Private Partnership in the field of Health and HIV/AIDS in the context of policies developed by DFID-UK, the World Bank Washington DC, USAID Washington DC and FHI Arlington, Virginia.

Senior consultant. **PricewaterhouseCoopers, Rabat office, Local Fund Agent for the Global Fund ATM HIV/AIDS Proposal follow-up in Algeria and Morocco. Alger.** June 2004. To provide technical assistance to the MOH in Alger to prepare the implementation of the HIV/AIDS component of the GF Proposal. To finalize the programming and monitoring and evaluation tools. To provide public health expertise to the LFA in the process of conducting the background analysis of the PR assessment, prior to the Grant signature and disbursement of the funds for phase 1.

Team leader. **French Ministry of Foreign Affairs/CREDES. Senegal. Benin. Cameroon. Vietnam.** Feb to May 2004. Provision of technical assistance to the Global Fund against AIDS, TB and Malaria to conduct the evaluation case studies of the Country Coordinating Mechanisms (CCM) in 4 countries in the context of the implementation of the Global Fund against AIDS, TB and Malaria Proposals: Bénin, Cameroun, Sénégal and Viêt-Nam. CCM Case Study field work and technical support needs assessment conducted in Senegal. Analysis of the CCM in the context of national institutional organization of the countries' response against HIV and the implementation of the World Bank Multisectoral AIDS Programmes (MAPs). Summary report on case studies findings in the 4 countries and comments on the Local Fund Agent's role and responsibilities.

Senior Consultant. **UNAIDS and The Global Fund to fight against AIDS, TB and Malaria. Nairobi, Kenya.** May 2004. To assist in the facilitation of a regional meeting between Eastern and Southern African countries with the GFATM Secretariat. Report to UNAIDS on major findings and issues that came up at the meeting.

Team leader. **FHI/USAID and UNAIDS. Eritrea.** March 2004. Provision of technical assistance to the National HIV/AIDS/STI and TB Control Division of the Ministry of Health in Eritrea on HIV/AIDS clinical management, care and treatment in the context of the implementation of the HIV/AIDS Component of the Global Fund Proposal in Eritrea.

Senior **Consultant USAID. Mali.** January 2004. Provision of technical assistance to help the Government of Mali develop the fourth-round submission HIV/AIDS Proposal to the Global Fund against AIDS, TB and Malaria. HIV/AIDS Situation and Response analysis in Mali. Strategic Planning in the field of Behavior change and communication, PMTCT, Care and psychological support, socioeconomic support to People living with HIV, their families, and

orphans and vulnerable children. Design of the Project management unit in the context of the institutional organization of the fight against HIV/AIDS/STI, TB and Malaria in Mali.

Team leader for **CREDES/European Commission/Europe Aid Office. Caribbean African Caribbean and Pacific countries (Caribbean Community CARICOM)**. October-November 2003. Mid-term Review for a CARICOM based Regional HIV/AIDS/STI Project in the Caribbean: "Strengthening the institutional response to HIV/AIDS/STI in the Caribbean". Project N° 8ACP TPS 018, supporting six regional institutions involved: CARICOM (Caribbean community), CAREC (Caribbean epidemiology centre), CHRC (Caribbean health research council), CRN+ (Caribbean regional network of people living with HIV/AIDS), UWI (University of West Indies) and UNAIDS Caribbean Inter Country Team.

Evaluation of a Multisectoral HIV/AIDS Programme with an emphasis on institutional strengthening of regional organizations to improve national responses against HIV epidemic. Good knowledge of European Commission Project Cycle Management. Field visits in Guyana, Trinidad, Jamaica, Barbados and the Dominican Republic.

Team leader for **CREDES/Ministry of Foreign Affairs-French Ministry of Foreign Affairs. Niger**. June 2003. Evaluation of a 7-year urban health project to expand access to, and quality of, health care services in Niamey-Niger (Regional Hospital and 9 urban health centres).

Team leader for a Joint **UNAIDS and FHI/USAID assignment in Eritrea**. May 2003. Provision of technical assistance to the Government of Eritrea to develop the 3rd round submission Proposal to the Global Fund to fight against HIV/AIDS and TB.

Senior Consultant for **IRIS-Conseil-Santé/European Commission/Europaid Office**. October-February 2003.
