## DUAL MASTER'S DEGREE IN INTERNATIONAL AFFAIRS

Graduation ceremony at MGIMO

# A PROGRAMME OF EXCELLENCE IN INTERNATIONAL AFFAIRS

Sciences Po and Moscow State University of International Relations (MGIMO) are both members of the APSIA (Association of Professional Schools of International Affairs) and have been partner institutions for 15 years. They share the conviction that a sound, multidisciplinary education oriented towards international affairs constitutes a major asset for future leaders and experts destined for international careers.

Set in a multicultural environment, the dual master's degree aims to train young professionals to a high level in two years, equipping them with the knowledge and necessary skills to thrive in international environments, the private sector, national and international public institutions and NGOs. Multidisciplinary, this selective and demanding program unites international relations and social sciences, and courses at an operational and professional level.

## YEAR 1 AT SCIENCES PO (IN PARIS)

### Paris School of International Affairs *(English)*

International security  
Environmental policy  
Human rights & humanitarian action  
International development  
International economic policy  
International public management  
International energy

## YEAR 2 AT MGIMO (IN MOSCOW)

### Semester 1: Core curriculum in Russian studies

World politics and international security *(Russian)*  
International energy policy *(English and Russian)*

### Semester 2: compulsory internship

**“** I work as a fellow at the Energy Charter Secretariat - an intergovernmental organisation whose original core activities deal with investments in the energy sector of European and Eurasian states. I am very glad to be in a place where my dual degree is relevant.

*This choice of study is unconventional and unique. I sought to use this experience to my advantage and eventually landed an entry position in an organisation that works closely with post-Soviet Eurasian countries.*

**Augustin Chabrol**, graduated in 2016
